FIRE FLOW

Except in the event of a fire or similar emergency, or unless prior arrangements are made with the District for limited, scheduled water usage through fire flow lines, a customer served by fire flow lines:

- (a) equipped with a water meter shall be charged for water usage of not less than \$500 or on the basis of the current water rate per 1,000 gallons multiplied by the metered water usage or if the District has reason to believe that such water meter is not registering properly, the volume of water usage reasonably estimated by the District on the basis of the best information available to the District,
or
- (b) equipped with flow detection devices shall be charged for water usage for all or any portion of each month during which water flow is detected through such fire flow line(s), not less than \$500 or an amount determined by multiplying the current water rate per 1,000 gallons times the volume of water usage reasonably estimated by the District on the basis of the best information available to the District,
or
- (c) not equipped with flow detection or metering devices shall be charged for water usage of not less than \$500 or on the basis of the current water rate per 1,000 gallons multiplied by the volume of water usage over such period of time as may be reasonably estimated by the District on the basis of the best information available to the District.
